GOOGLE SEARCH CONSOLE · SEO ACTION PLAN

Getting your 10 best pages into Google's top 10

A full analysis of the 10 pages on www.crcrepair.co.uk that got the most clicks, with a step-by-step plan to move their main searches onto page 1.

SITE CLICKS (30 DAYS)	HOMEPAGE CLICKS	OTHER 9 PAGES' CLICKS	SITE AVG POSITION
728	**152**	**302**	**16.6**
−37% vs prev. 30 days (1,148)	−80% (was 776)	+88% (was 161)	CTR 0.88%

The most important finding

Your homepage traffic collapsed on **29 September 2026**, five days after Google's September spam update. Between 6 and 12 October it almost disappeared from search results. Google also lists a **casino spam page on your bare domain** (crcrepair.co.uk/store/...) as a page linking to your homepage. Before any other work, check whether the site has been hacked (Step 1).

The good news

Your city pages are growing: Surrey Quays +134%, Norwich 1 → 45 clicks, Farringdon 3 → 14, Whetstone 5 → 16. Most of their money searches are already on page 2 (positions 8–20). That's the quickest route to more bookings.

Data: Google Search Console, property https://www.crcrepair.co.uk/ · Period 29 Sep – 28 Oct 2026, compared with 30 Aug – 28 Sep 2026 · Web search · Report prepared 31 Oct 2026

01 The top 10 pages at a glance

These are ranked by clicks over the last 30 days. Position is Google's average ranking (1 = top result). The last column shows mobile and desktop positions separately. That gap explains a lot about how your pages perform.

#	PAGE	CLICKS	VS PREV.	IMPR.	CTR	POS.	POS. TREND	MOB / DESK
1	**Homepage** /	152	-80%	29,966	0.51%	21.6	14.7 → 21.6	20.5 / 24.3
2	**Surrey Quays** /surreyquays/	89	+134%	3,642	2.44%	9.1	11.0 → 9.1	4.7 / 12.3
3	**Norwich** /norwich/	45	+4400%	2,972	1.51%	25.1	23.3 → 25.1	22.7 / 36.8
4	**Bournemouth** /bournemouth/	37	+42%	2,710	1.37%	11.8	14.6 → 11.8	9.4 / 16.3
5	**Glasgow** /glasgow/	37	+37%	2,193	1.69%	12.5	12.5 → 12.5	6.1 / 20.8
6	**Wolverhampton** /wolverhampton/	29	+81%	2,690	1.08%	13.7	8.5 → 13.7	8.3 / 24.5
7	**Laptop Repair Glasgow** /laptop-repair-glasgow/	18	-50%	1,319	1.36%	10.1	9.9 → 10.1	8.3 / 16.9
8	**Romford** /romford/	17	+89%	2,198	0.77%	14.5	16.2 → 14.5	7.6 / 23.0
9	**Whetstone** /whetstone/	16	+220%	1,062	1.51%	11.8	7.0 → 11.8	3.0 / 15.9
10	**Farringdon** /farringdon/	14	+367%	1,253	1.12%	19.8	23.6 → 19.8	4.2 / 28.8

02 Five patterns across all 10 pages

1 · BRAND SEARCHES WORK, SERVICE SEARCHES DON'T

'Pocket geek <city>' ranks in the top 3 for every store. Searches like 'phone repair <city>' and 'iphone screen repair <city>' (which bring in new customers) mostly sit at positions 10–50. The plan concentrates on those searches.

2 · STRONG ON MOBILE, WEAK ON DESKTOP

On mobile, the city pages rank at 3–9. On desktop they rank at 12–37. Google ranks local results by how close the searcher is, and desktop searches often come from further away. Stronger local signals (Google Business Profile, reviews, local citations) close this gap.

3 · CITY PAGES LOOK TEMPLATED

Farringdon shows up for 'mobile phone repairs surrey quays', and Romford for 'samsung phone repair brentford'. Google sees the pages as near-copies of each other. Unique local content on each page is the single biggest ranking lever.

4 · YOUR OWN PAGES COMPETE WITH EACH OTHER

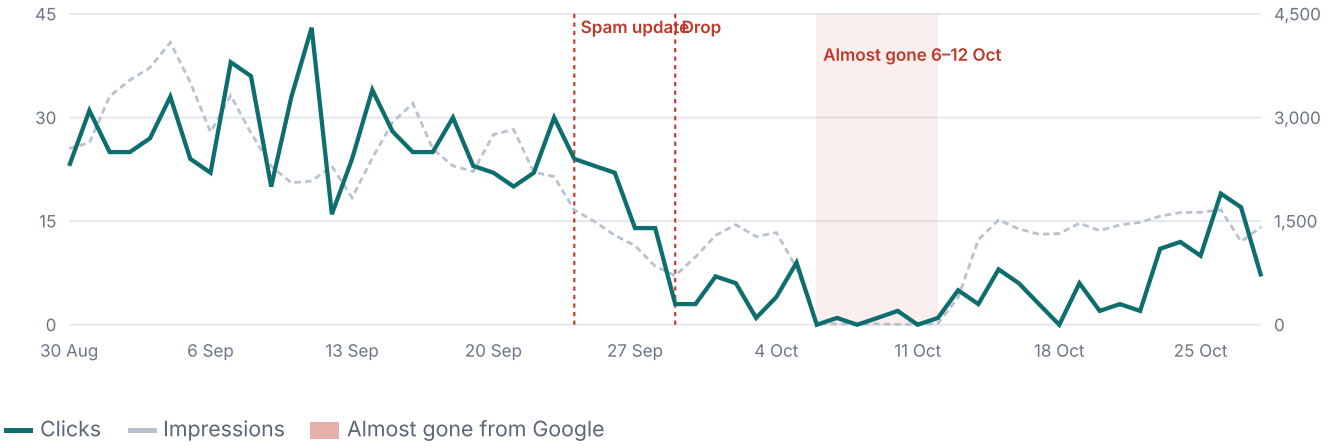

/glasgow/ and /laptop-repair-glasgow/ both go after 'laptop repair glasgow'. Bournemouth has /bournemouth/, /bournemouth/screen-repair/, /bournemouth/iphone-repair/ and /console-repair-bournemouth/ overlapping. Each search needs one clear winning page.

5 · THE 'POCKET GEEK' NAME IS SHARED WITH OTHER COMPANIES

The bare search 'pocket geek' gave Wolverhampton 661 impressions at position 29.5 and 0 clicks, and the homepage 'geekgadget.net contact number'. That search is dominated by other companies using the Pocket Geek name. Use the full name **'Pocket Geek Tech Repair by CRC Repair'** everywhere: titles, schema, Google Business Profiles and citations. That way Google treats you as a distinct business and stops testing you against the generic search.

03 What happened to the homepage

Daily homepage clicks (solid line, left axis) and impressions (dashed line, right axis), 30 Aug – 28 Oct 2026.

TIMELINE

- **Before 24 Sep:** about 27 clicks a day, average position 11–17.
- **24 Sep:** Google's September 2026 spam update starts.
- **29 Sep:** clicks fall to 3 a day and the position drops to about 19.
- **6–12 Oct:** impressions fall to 5–19 a day, so the homepage was effectively removed from results.
- **13 Oct onwards:** it comes back at position about 24, and has recovered to about 18 by 28 Oct (7–19 clicks a day).

EVIDENCE TO CHECK

- Google's URL Inspection lists **crcrepair.co.uk/store/richroger-casino-pros-and-cons-for-uk-players/** as a page linking to your homepage. A casino page on your own domain is a classic sign of a hacked site or SEO spam injection, which is exactly what spam updates target.
- That URL is on the bare domain (without www), which this Search Console property doesn't cover. That's why it doesn't show up in your reports.
- The homepage itself currently passes inspection: indexed, crawled 31 Oct, and Google picks your own URL as the main version (canonical). The damage is about trust, not a technical block.

Why this comes first

If spam pages are live on any part of crcrepair.co.uk, Google can lower its trust in the whole domain. If so, improving content on the city pages won't fully pay off. Cleaning up the spam and asking Google to re-check the site is the highest-value step in this plan.

04 Page-by-page analysis

Position colours: 1–3 top 3 · 4–10 page 1 · 11–20 page 2, quick win · 21+ needs real work. Impressions are for the last 30 days.

1 Homepage /

Main brand page for the whole country

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
152	29,966	0.51%	21.6	20.5 / 24.3
-80% vs prev.	prev. 74,795		prev. 14.7	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
screen replacement	959	10.6
phone repair shops near me	414	9.5
phone repair near me	194	14.7
screen repair	160	11.7
phone screen repair	158	20.5
geekgadget.net contact number	155	11.9
phone screen replacement	143	26.8
pocket geek tech repair	131	3.6

WHAT THE DATA SHOWS

- Clicks fell **80%** (776 → 152) and the average position slipped from 14.7 to 21.6. The drop started on **29 Sep**, five days after Google's September 2026 spam update. Between 6 and 12 Oct the homepage got almost no impressions (5–19 a day), then came back at a worse position. It has been recovering slowly since (position 26 → 17.6).
- Your brand searches still work: 'crc repair' (position 2.4, 30% CTR) and 'pocket geek tech repair' (position 3.6). Searches like 'pocket geek glasgow' that used to land on the homepage now go to the city pages. That's healthy, but it means the homepage no longer collects those clicks.
- Desktop got 19,732 impressions but only 17 clicks (position 24). Generic 'near me' searches are won by the Google Maps listings and by local pages, not by a homepage that covers the whole UK.
- One irrelevant search is attached to the homepage: 'geekgadget.net contact number' (155 impressions). Google may be confusing your brand with another company.

ACTIONS

1. Treat the 29 Sep – 12 Oct drop as an incident (see Step 1) before doing any other work on this page.
2. Point the homepage at brand searches and 'phone repair UK / phone repair shop' searches, with a clear store finder that links prominently to every city page.
3. Rewrite the title to something like: *Pocket Geek Tech Repair by CRC Repair | Phone, Laptop & Console Repair – 9 UK Stores*.
4. Add Organization schema plus a list of your stores (one LocalBusiness entry per store, each linking to its city page) so Google understands the brand and how the locations fit together.

2 Surrey Quays /surreyquays/

Your best city page and the model for the others

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
89	3,642	2.44%	9.1	4.7 / 12.3
+134% vs prev.	prev. 2,773		prev. 11.0	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
pocket geek	139	19.6
cracked phone screen repair surrey quays	84	5.8
phone camera repair surrey quays	76	7.1
iphone screen repair surrey quays	74	6.1
phone repair surrey quays	73	2.1
phone battery replacement surrey quays	68	8.2
phone microphone repair surrey quays	62	6.0

WHAT THE DATA SHOWS

- Clicks more than doubled (+134%). It's already on page 1 on average, and on mobile it sits at position 4.7 with a 6% CTR.
- 56% of its impressions are already in the top 3. The rest are mostly service searches in positions 5–8 (screen, camera, battery, microphone).
- On desktop it's at position 12.3, so desktop searchers further away mostly see competitors.

ACTIONS

1. Win positions 5–8 → top 3: add a short section for each repair (screen, camera, battery, microphone, charging port), each with a 'from £X' price and turnaround time, and link to the matching /surreyquays/... sub-pages.
2. Target nearby areas in the text and in the Google Business Profile description: Rotherhithe, Canada Water, Bermondsey, Deptford.
3. Add 5–10 recent Surrey Quays Google reviews to the page (with Review schema), plus photos of the store and a 'how to find us in the shopping centre' section.
4. Use this page as the template when you rebuild the other city pages.

3 Norwich /norwich/

Growing fast from a low base, but the weakest rankings

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
45	2,972	1.51%	25.1	22.7 / 36.8
+4400% vs prev.	prev. 850		prev. 23.3	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
phone repair norwich	129	31.0
mobile phone repairs norwich	102	50.6
mobile repair norwich	82	23.5
pocket geek norwich	74	2.9
computer repair norwich	62	39.5
iphone repair norwich	61	16.2
phone shop norwich	49	34.0

WHAT THE DATA SHOWS

- Clicks went from 1 to 45, but almost all of them come from the brand search 'pocket geek norwich'.
- 72% of impressions are at position 21 or worse. The main money searches sit on pages 3–5: 'phone repair norwich' at 31, 'mobile phone repairs norwich' at 50.6.
- There are big desktop impressions at position 36.8. Google doesn't yet trust this page as a local authority.

ACTIONS

1. This page needs the deepest rework: 800–1,200 words of content specific to Norwich (store location, parking and transport, a team photo, real repair examples, prices, FAQs).
2. Put 'Phone Repair Norwich' first in the title and H1, with 'iPhone, Samsung & Laptop Repairs' as secondary terms.
3. Build local trust: get listed in Norwich directories (Yell, Thomson Local, Norwich BID, Chamber of Commerce) and make sure the name, address and phone number are identical everywhere. Get links from local Norwich news or sponsorships.
4. Push the Norwich Google Business Profile: weekly posts, photos, and a target of 30+ reviews that mention 'phone repair'.

4 Bournemouth /bournemouth/

Most searches close to page 1, so the quickest wins

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
37	**2,710**	**1.37%**	**11.8**	**9.4 / 16.3**
+42% vs prev.	prev. 4,844		prev. 14.6	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
phone repair bournemouth	77	11.9
mobile phone repairs bournemouth	53	14.8
phone speaker repair bournemouth	50	8.0
iphone screen repair bournemouth	47	16.6
phone screen replacement bournemouth	45	16.6
same day phone repair bournemouth	42	15.0
samsung phone repair bournemouth	37	8.0
laptop repair bournemouth	28	8.9

WHAT THE DATA SHOWS

- 44% of impressions are in positions 11–20, the most of any page. This is the cheapest page to push into the top 10.
- Your own pages compete with each other: /bournemouth/screen-repair/ (772 impressions, position 38, 0 clicks), /bournemouth/iphone-repair/ (1,664 impressions, position 22) and /console-repair-bournemouth/ all go after overlapping searches.
- Its position improved (14.6 → 11.8), but impressions halved because the homepage stopped sharing them.

ACTIONS

1. Title: *Phone Repair Bournemouth | Same-Day iPhone & Samsung Screen Repair – Pocket Geek*.
2. Add H2 sections for 'iPhone Screen Repair Bournemouth', 'Same-Day Phone Repair' and 'Samsung Repair', each linking down to the sub-page. Each sub-page should link back up with the anchor text 'phone repair Bournemouth'.
3. Redirect /console-repair-bournemouth/ (301) to /bournemouth/gaming-console-repair/, and redirect /bournemouth-price-match/ into the main page or make it noindex.
4. Rewrite /bournemouth/screen-repair/ to be clearly different from /bournemouth/iphone-repair/ (screens for all brands, compared with iPhone only).

5 Glasgow /glasgow/

Strong brand, weak on the generic 'phone repair glasgow' search

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
37	**2,193**	**1.69%**	**12.5**	**6.1 / 20.8**
+37% vs prev.	prev. 2,106		prev. 12.5	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
pocket geek glasgow	127	3.3
phone repair glasgow	50	25.8
fix my phone glasgow	40	28.8
samsung phone repair glasgow	39	43.6
cracked phone screen repair glasgow	36	36.9
phone screen replacement glasgow	34	37.1
laptop repair glasgow	29	7.3

WHAT THE DATA SHOWS

- Glasgow is a big, competitive market. 'phone repair glasgow' is at position 25.8 and most service searches are at 37–46.
- It competes with /laptop-repair-glasgow/ for 'laptop repair glasgow'. Google switches between the two pages, which holds both back.
- Before the drop, the homepage ranked for 'iphone repair glasgow' at position 5.4 and 'pocket geek st enoch' at 2.5. The store is in St Enoch Centre, which is a strong local signal you aren't using enough.

ACTIONS

1. Title and H1: *Phone Repair Glasgow – St Enoch Centre | Pocket Geek Tech Repair*.
2. Cut the laptop section here down to a short summary that links to /laptop-repair-glasgow/ as THE laptop page for Glasgow.
3. Add sections on how to find the store inside St Enoch Centre, plus Glasgow-specific FAQs and prices for iPhone and Samsung screens.
4. Get links from local sources: the St Enoch Centre store directory page (ask centre management), Glasgow student unions and local blogs.

6 Wolverhampton /wolverhampton/

Close to page 1 on mobile, but the average position slipped

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
29	**2,690**	**1.08%**	**13.7**	**8.3 / 24.5**
+81% vs prev.	prev. 3,277		prev. 8.5	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
pocket geek	661	29.5
pocket geek wolverhampton	76	3.8
phone repair wolverhampton	53	9.8
laptop repair wolverhampton	39	8.5
computer services wolverhampton	33	16.2
phone clinic wolverhampton	28	6.1
playstation repair in wolverhampton	19	41.5

WHAT THE DATA SHOWS

- The average position got worse (8.5 → 13.7). That's almost entirely because Google tested this page for the national search 'pocket geek' (661 impressions at position 29.5). That search is dominated by other companies using the 'Pocket Geek' name.
- The core searches are on the edge of the top 10: 'phone repair wolverhampton' at 9.8, 'laptop repair wolverhampton' at 8.5.
- 'playstation repair in wolverhampton' lands on this page at position 41.5 even though /wolverhampton/playstation-repair/ exists. Internal linking to the sub-page is too weak.

ACTIONS

1. Title: *Phone & Laptop Repair Wolverhampton | Pocket Geek Tech Repair*.
2. Add a 'Computer & Laptop Repair' section to win 'computer services/repair wolverhampton'.
3. Add a clear 'Console Repairs' block linking to /wolverhampton/playstation-repair/ and /wolverhampton/gaming-console-repair/.
4. Always use the full brand name, 'Pocket Geek Tech Repair', so you stop competing for the bare 'pocket geek' search.

7 Laptop Repair Glasgow /laptop-repair-glasgow/

Laptop page sitting on the edge of page 1

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
18	1,319	1.36%	10.1	8.3 / 16.9
-50% vs prev.	prev. 2,601		prev. 9.9	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
laptop repair	129	7.2
laptop repair glasgow	103	9.3
laptop repair near me	68	8.9
laptop repairs glasgow	19	8.9
laptop repair in glasgow	19	9.6
computer repair in glasgow	19	30.3
computer repair glasgow	9	51.4
pc repairs glasgow	6	54.5

WHAT THE DATA SHOWS

- Clicks halved (36 → 18) even though the position is about the same (9.9 → 10.1). It's hovering at positions 9–10, where a small drop costs most of the clicks.
- Searches for computer and PC repair rank on pages 3–6 (positions 30–55) because the page talks only about laptops.
- Its URL is outside the /glasgow/ folder, which makes it look disconnected from the Glasgow location.

ACTIONS

1. Rename it to *Laptop & Computer Repair Glasgow*. Add sections on PC and desktop repair, MacBook repair, and virus removal / data recovery.
2. Add laptop prices (screen, battery, keyboard, SSD upgrade) and typical turnaround times.
3. Link to it from /glasgow/ and from /laptop-repair/ with the anchor 'laptop repair Glasgow'. Consider moving it to /glasgow/laptop-repair/ with a 301 redirect, but only after the page has recovered.
4. Ask laptop customers in Glasgow for reviews that mention 'laptop repair'.

8 Romford /romford/

Many searches in positions 5–13, but low CTR

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
17	2,198	0.77%	14.5	7.6 / 23.0
+89% vs prev.	prev. 2,938		prev. 16.2	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
phone repair romford	69	7.0
it support romford	61	45.3
mobile phone repairs romford	49	9.4
same day phone repair romford	40	5.5
cracked phone screen repair romford	39	12.6
iphone screen repair romford	37	10.3
samsung phone repair romford	35	8.4
phone screen replacement romford	30	11.3

WHAT THE DATA SHOWS

- It ranks at positions 5–12 for most phone searches but gets very few clicks (CTR 0.77%). The title and description aren't persuading people to click.
- The Romford sub-pages are very weak (/romford/iphone-repair/ position 50, /romford/samsung-repair/ position 49).
- It shows up for irrelevant searches such as 'samsung phone repair brentford'. That suggests near-duplicate template text.

ACTIONS

1. Rewrite the title and meta description around the offer: *Phone Repair Romford – Same-Day Screen Repair from £X | Lifetime Warranty*.
2. Add 'from £X' prices for iPhone and Samsung screens, plus FAQ schema covering price, time and warranty.
3. Rewrite the Romford sub-pages so they aren't templated, and link to them from the main page.
4. Only add IT support content if you really offer it (61 impressions).

9 Whetstone /whetstone/

Excellent on mobile, page 2 on desktop

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
16	**1,062**	**1.51%**	**11.8**	**3.0 / 15.9**
+220% vs prev.	prev. 1,585		prev. 7.0	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
phone repair whetstone	48	6.4
mobile phone repairs whetstone	47	15.1
phone battery replacement whetstone	44	5.4
iphone screen repair whetstone	43	30.6
phone screen replacement whetstone	42	17.2
samsung phone repair whetstone	38	15.0
fix my phone whetstone	36	12.7
phone camera repair whetstone	36	11.7

WHAT THE DATA SHOWS

- On mobile the average position is 3.0, but those 89 mobile impressions brought 0 clicks. Searchers are probably choosing the Google Maps listings above it.
- 50% of impressions are at positions 11–20: almost every service search is on page 2.
- 'iphone screen repair whetstone' is at position 30.6, which suggests the page barely mentions iPhone screens.

ACTIONS

1. Add sections for iPhone screen repair, Samsung repair and same-day repair, each with a price.
2. Mention nearby areas: Totteridge, Oakleigh Park, North Finchley, Barnet, N20.
3. The Whetstone Google Business Profile is where the mobile clicks are won: add more reviews and photos, and set the primary category to 'Mobile phone repair shop'.
4. Use link text like 'Whetstone phone repair' on internal links from the homepage and the store locator.

10 Farringdon /farringdon/

Central London, very competitive; desktop rankings are weak

CLICKS	IMPRESSIONS	CTR	AVG POSITION	MOBILE / DESKTOP POS.
14	**1,253**	**1.12%**	**19.8**	**4.2 / 28.8**
+367% vs prev.	prev. 1,670		prev. 23.6	

SEARCHES TO WIN

SEARCH TERM	IMPR.	POS.
water damaged phone repair farringdon	42	20.8
phone repair farringdon	40	16.8
phone camera repair farringdon	39	21.6
phone speaker repair farringdon	39	8.6
same day phone repair farringdon	39	30.3
mobile phone repairs farringdon	36	17.4
cracked phone screen repair farringdon	34	39.8
fix my phone farringdon	33	9.6

WHAT THE DATA SHOWS

- Only 9% of impressions are in the top 3. Desktop is at position 28.8 because central London has a lot of competition.
- The page shows up for 'mobile phone repairs surrey quays' (position 89), a sign that the city pages share too much identical text.
- Screen searches rank worst (cracked screen at 39.8, iPhone screen at 40.6), even though they're the most valuable.

ACTIONS

1. Write fully unique copy: mention Clerkenwell, Barbican, Smithfield, City of London and EC1, and target office workers with lunchtime and same-day messages.
2. Build the page around screen repair. The H2s should cover iPhone screen repair, Samsung screen repair and cracked screen prices.
3. Get local links: Farringdon business groups and listings for Clerkenwell Design Week and local events.
4. Collect reviews that mention 'Farringdon' and 'screen repair'.

05 The step-by-step plan

Work through the steps in order. Each step builds on the one before. Steps 1–3 are about trust and fixing structural problems. Steps 4–7 move the page-2 searches into the top 10.

Step 1
Week 1

Check the site for hacked pages and spam CRITICAL

1. Open **crcrepair.co.uk/store/richroger-casino-pros-and-cons-for-uk-players/** and the /store/ folder on the bare domain. Look for any pages you didn't create (casino, betting, loans and similar).
2. In WordPress or your hosting panel: list all users and remove unknown admins, scan with Wordfence or Sucuri, update all plugins and themes, and change every password (hosting, FTP, database, CMS).
3. Delete the spam pages so they return a 410 or 404 error. Check robots.txt, .htaccess and the sitemap for injected entries.
4. Add a **Domain property** (sc-domain:crcrepair.co.uk) in Search Console so you can see the www, bare-domain and subdomain versions together. Then check the *Security & Manual Actions* section.
5. If there's a manual action, fix it and submit a reconsideration request. Otherwise, request reindexing of the homepage and the 10 pages through URL Inspection.
6. Check what changed on the site around 26–29 Sep and 6 Oct (plugins, theme, hosting, Cloudflare or firewall rules).

Step 2
Week 1–2

Fix your pages competing with each other HIGH

1. Pick **one page per search**: /laptop-repair-glasgow/ for laptop searches in Glasgow, and /glasgow/ for phone searches in Glasgow.
2. Redirect (301) duplicates into the main page: /console-repair-bournemouth/ → /bournemouth/gaming-console-repair/; /book-a-repair/ → /book-a-repair (or the other way round, as long as it's consistent); /we-repair-samsung/ → /samsung-repair/.
3. Make old or test pages noindex: /ai-booking-test/, /con-samsung-s/, /eod/, /summerball-bournemouth-2025(-2)/, /romford-bid-video/.
4. Check that each city page declares itself as the main version (self-referencing canonical) and appears in the XML sitemap.

Step 3
Week 2

Rewrite titles, meta descriptions and H1s HIGH

1. Use this format: **[Service] [City] | [Main benefit] – Pocket Geek Tech Repair**, kept under 60 characters where possible.
2. Meta descriptions should give a price, speed and trust: *"Cracked screen? Same-day iPhone & Samsung repairs in Romford from £X. Lifetime warranty, [rating]★ from [N] Google reviews. Walk in or book online."*
3. The H1 should match the main search exactly, e.g. 'Phone Repair Bournemouth'. Use the full brand name everywhere, not just 'Pocket Geek'.
4. Expected effect: higher CTR on pages that already rank at positions 5–12 (Romford, Whetstone, Bournemouth).

Step 4
Weeks 2–5

Rebuild every city page with unique local content HIGH

1. Use Surrey Quays as the template. For each city, write 800–1,200 words that apply **only** to that store:
   - Address, how to find the store (shopping centre, entrance, nearby landmarks), parking and transport, opening hours, an embedded Google Map.
   - A price table for the top repairs (iPhone screen, Samsung screen, battery, charging port, back glass, laptop screen), with turnaround times.
   - An H2 section for each main service, matching the searches in section 04, each linking to the city sub-page.
   - Real photos of the store and team, 3–5 recent local reviews, and 2–3 short repair case studies.
   - 5–8 local FAQs (e.g. 'How much is an iPhone 15 screen repair in Norwich?') marked up with FAQPage schema.
   - Nearby areas served (e.g. Whetstone: Totteridge, N20, North Finchley; Farringdon: Clerkenwell, Barbican, EC1).
2. Order of work (fastest wins first): **Bournemouth → Romford → Whetstone → Wolverhampton → Laptop Glasgow → Surrey Quays → Glasgow → Farringdon → Norwich**.

Step 5
Week 3

Schema and internal links MEDIUM

1. Add **LocalBusiness / MobilePhoneRepair** schema to each city page: name 'Pocket Geek Tech Repair – [City]', address, geo coordinates, opening hours, phone, priceRange, aggregateRating, and a parentOrganization pointing to CRC Repair.
2. Homepage: Organization schema with a list of all stores, plus a visible store-finder grid with a block for each city.
3. Internal links: homepage → each city page (anchor 'Phone repair [City]'); each sub-page → its city page; each national service page (e.g. /iphone-repair/) → all city versions.
4. Add breadcrumbs (Home › Glasgow › iPhone Repair) with BreadcrumbList schema.

Step 6
Weeks 3–8

Google Business Profiles and reviews (wins mobile and desktop rankings) HIGH

1. Each profile: primary category 'Mobile phone repair shop', secondary categories (computer repair, video game repair), the services list with prices, and the website link pointing to **the city page**, not the homepage.
2. Post weekly (offers, repair photos) and add 10+ fresh photos a month for each store.
3. Reviews: ask every customer by SMS or email after collection, aiming for **10+ new reviews per store per month**. Reply to all of them, mentioning the service and city where it fits naturally.
4. Citations: identical name, address and phone on Yell, Thomson Local, Apple Maps (Business Connect), Bing Places, Facebook, Trustpilot, Checkatrade-style directories and the shopping-centre directories.

Step 7

Months 2–3

Local links and authority MEDIUM

1. Ask each shopping centre (St Enoch, Surrey Quays and others) to link to the matching city page from its store directory.
2. Get local press and community links: student discounts with local universities, sponsoring a local team or event, and a 'phone recycling' or eco story (you already have the content: *The environmental impact of smartphone repairs*).
3. Link from your blog posts to the right city or service pages (e.g. the iPhone screen cost article → /[city]/iphone-repair/).
4. Disavow obvious spam links only if Step 1 finds a link-spam pattern.

Step 8

Ongoing

Measure, check and adjust MEDIUM

1. Track the target searches below weekly, by city and on mobile and desktop separately.
2. Annotate every change in Search Console or your SEO tool, so you can tie movements to the work.
3. After 4–6 weeks, compare each page against this report. Pages that haven't moved get another round of content and link work.

06 Targets for the next 90 days

PAGE	MAIN SEARCH	NOW	90-DAY TARGET
Homepage	Avg position (all searches)	21.6	≤ 15 (back to the level before 29 Sep)
Surrey Quays	iphone screen repair surrey quays	6.1	Top 3
Norwich	phone repair norwich	31.0	Top 10
Bournemouth	phone repair bournemouth	11.9	Top 5
Glasgow	phone repair glasgow	25.8	Top 10
Wolverhampton	phone repair wolverhampton	9.8	Top 5
Laptop Repair Glasgow	laptop repair glasgow	9.3	Top 5
Romford	mobile phone repairs romford	9.4	Top 5 and CTR > 3%
Whetstone	mobile phone repairs whetstone	15.1	Top 10
Farringdon	phone repair farringdon	16.8	Top 10

Combined goal for the 10 pages: **from 454 to 900+ clicks a month**. That means recovering the homepage and roughly doubling the city pages.

07 Notes on this analysis

- The figures come from the Google Search Console API (web search). Search-term figures cover only the searches Google reports. Hidden (anonymised) searches make up about 50–64% of clicks, so the page totals are higher than the sum of the search terms listed.
- Many '[service] [city]' searches have very similar impression counts (about 30–80) in every city. Some of these may be automated rank-tracking checks rather than real customers. Judge success by clicks and bookings, not just impressions.
- The live pages couldn't be crawled for this report. The Search Console audit bot got HTTP 403 (blocked) on every page, probably a firewall or Cloudflare rule. Googlebot itself crawls the pages fine according to URL Inspection. The on-page advice is therefore based on search data, so compare each point with the current page before changing it.
- Core Web Vitals data wasn't available (no Chrome UX Report key is set up). Check page speed in PageSpeed Insights, especially on mobile.
